

## Mathematical Modeling in Renal Physiology

Filesize: 8.14 MB

### ***Reviews***

*The most effective pdf i ever read through. I am quite late in start reading this one, but better then never. Its been developed in an exceedingly simple way in fact it is only soon after i finished reading through this pdf by which in fact altered me, modify the way i think.*

*(Audra King IV)*

## MATHEMATICAL MODELING IN RENAL PHYSIOLOGY

DOWNLOAD

Book Condition: New. Publisher/Verlag: Springer, Berlin | With the availability of high speed computers and advances in computational techniques, the application of mathematical modeling to biological systems is expanding. This comprehensive and richly illustrated volume provides up-to-date, wide-ranging material on the mathematical modeling of kidney physiology, including clinical data analysis and practice exercises. Basic concepts and modeling techniques introduced in this volume can be applied to other areas (or organs) of physiology. The models presented describe the main homeostatic functions performed by the kidney, including blood filtration, excretion of water and salt, maintenance of electrolyte balance and regulation of blood pressure. Each chapter includes an introduction to the basic relevant physiology, a derivation of the essential conservation equations and then a discussion of a series of mathematical models, with increasing level of complexity. This volume will be of interest to biological and mathematical scientists, as well as physiologists and nephrologists, who would like an introduction to mathematical techniques that can be applied to renal transport and function. The material is written for students who have had college-level calculus, but can be used in modeling courses in applied mathematics at all levels through early graduate courses. | 1. Introduction: Basics of Kidney Physiology.- 2. Glomerular Filtration.- 3. Urine Concentration.- 4. Counter-current Exchange Across Vasa Recta.- 5. Tubuloglomerular Feedback.- 6. Electrophysiology of Renal Vascular Smooth Muscle Cells.- 7. Vasomotion and Myogenic Response of the Afferent Arteriole.- 8. Transport Across Tubular Epithelia.- 9. Solutions to Problem Sets.- Index. | Format: Hardback | Language/Sprache: english | 360 gr | 237x155x11 mm | 221 pp.
