

## Bethnal Green Branch Museum. Catalogue of a Collection of Oriental Porcelain and Pottery Lent And Described by A.W .Franks

Filesize: 5 MB

### ***Reviews***

*Unquestionably, this is the best operate by any author. It is among the most amazing pdf i actually have read. Its been designed in an remarkably basic way which is just right after i finished reading this pdf by which basically altered me, change the way i believe.*

*(Harold Spencer)*

## BETHNAL GREEN BRANCH MUSEUM. CATALOGUE OF A COLLECTION OF ORIENTAL PORCELAIN AND POTTERY LENT AND DESCRIBED BY A.W .FRANKS

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 230 pages. Original publisher: Washington, D. C. : National Aeronautics and Space Administration, Office of Management, Scientific and Technical Information Division ; Springfield, Va. : For sale by the National Technical Information Service, 1990. OCLC Number: (OCoLC)61102747 Excerpt: . . . I. INTRODUCTION Low altitude microburst windshear represents a significant hazard to aircraft, particularly during take-off and landing; the intense down drafts and the resultant divergent outflow, can have a significant effect on the lift characteristics of the endangered aircraft. When encountered at low altitude, the pilot has little time to react correctly to maintain safe flight. The Federal Aviation Administration ( FAA ), jointly with the National Aeronautics and Space Administration ( NASA ), has sponsored an investigation into the development of airborne sensors to detect microburst windshear. One sensor of interest is a microwave Doppler radar operating at X-band or higher frequencies. Critical to the analysis of the capability of such a sensor to perform this detection is the microwave backscatter description of both the microburst event and the clutter background, especially during the approach and departure from an airport. The Environmental Research Institute of Michigan ( ERIM ) has provided NASA Langley Research Center ( LaRC ) with eight high-resolution calibrated synthetic aperture radar ( SAR ) images of selected airport scenes from the ERIM SAR data archive for use in their Microburst Clutter Radar simulation program and to statistically characterize the ground clutter surrounding these airports. In addition, statistical analyses of these airport environments have been performed by ERIM to describe the range of scattering conditions encountered. NASA LaRC has developed a Microburst Clutter Radar simulation program to assess the performance of Doppler radars for this application and to test potential signal processing techniques....
