Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1910 Excerpt: . already excessive. Herringham has given reasons for believing that the danger in this direction is not so great as we think, and the circumstances are desperate. Accordingly, while endeavoring to lighten the task of the kidneys by means of the skin, while using hot packs, hot air baths, and even injections of pilocarpin nitrate in order to secure the removal of some water and salts by perspiration, we must at the same time, by digitalis and theobromin sodium salicylate, try to raise the blood pressure and recover the level of excretion. If the uremia manifests itself, as it sometimes does, the inhalation of oxygen is an additional aid. Should the fits continue, relief must be given by bleeding. The Tuberculous Gland; Its Significance and its Treatment. In the Lancet, July 2, 1910, R. W. Philip gives the summary of his views from many years study....

Reviews

I actually started looking over this publication. It really is rally interesting throgh studying period. Once you begin to read the book, it is extremely difficult to leave it before concluding.
