Freehand Drawing, designed to educate the sense of form and proportion, to teach the eye to observe accurately, and to train the hand to rapidly delineate the forms either of existing objects or of ideals in the mind. 2. Mechanical Drawing, --including the use of instruments; geometric constructions; the arrangement of projections, elevations, planes, and sections; also the various methods of producing shades and shadows with pen. or brush. 3. Technical Drawing or Draughting, --illustrating conventional colors and signs; systems of architectural or shop drawings; and at the same time familiarizing the pupil with the proportions and details of various classes of machines and structures. Workshop Instruction.--In connection with drawing comes instruction in the nature, theory, and use of tools. But which are the tools whose use is to be taught? Before answering this question, it is to be observed that the apparently great variety in tools and mechanical processes arises from different combinations of very simple elements. The number of hand-tools is small: one can easily count them on his fingers. They are the axe, the saw, the plane, the hammer, the square, the chisel, and the file. The study of a tool involves an examination of its form and the theory of its action, as well as its actual use at the bench or forge. After the hand-tools, pupils should become familiar with the typical machine-tools which are chiefly employed in mechanical pursuits. A knowledge of materials and processes is...
