Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Psychobiology, Vol. 1 Psychobiology is established for the publication of research bearing on the interconnection of mental and physiological functions. It will include in its volumes therefore, not only investigations of what is sometimes called psychological physiology but also investigations in pharmacology, physiology, anatomy, neurology and psychiatry in so far as the results of these investigations have explicit bearing on problems of mental life, or mental factors are included in the essential conditions of the investigation. We would emphasize the fact that in spite of the increasing tendency in the several sciences represented, especially in psychology, to seek practical results, and formulate as quickly as possible conclusions having immediate application, it has been our purpose to establish another journal devoted to pure science, in which the ideals of those whose primary interests arc in sound scientific progress shall be represented as fully as possible. In pursuance of this purpose, we urge contributors to pay attention to the details of method and technique which alone can give their conclusions value, and we set no arbitrary limit of length. Papers submitted will be accepted in so far as space permits, if they conform to the following standards. (1) They must be in the proper field of the journal. (2) They must possess sufficient importance. (3) They must be adequately written. Unnecessary length and brevity arc alike excluded by this last criterion. Manuscript may be sent directly to the editor-in-chief. When an article lies in the special field of one of the associate editors, it may be sent to him.
